

# PT Mortarindo Prima Perkasa

## Starch Ether (SE) MSE501

MSE501 is a highly modified starch ether additive for many types of cement based mortars and gypsum based compounds.

Starch ether gives a better workability, smoother finish and sag resistance when combined with cellulose additives such as methocellulose.

### Application

Suitable as additive for mortar applications:

- Skimcoat finish
- Plaster
- Thinbed
- Tile adhesive
- Repair mortars

### Technical Data

Appearance	off white, fine powder
Solubility	in cold water
Ph Value	<9
Country of origin	Germany

### Packaging

25kg PP woven bag.

### Storage

Keep in unopened original packaging in a dry location. Protect from excessive heat less than 40°C

Shelflife more than 1 year with proper storage.
